

# Merger Control: Recent Developments in Digital Markets

As the digital economy continues to evolve at an unprecedented pace, the need for effective regulation and oversight of mergers and acquisitions (M&A) in the tech sector has never been more critical. This online course is designed to empower officials from competition authorities, lawyers, industry representatives and academics with a comprehensive understanding of the main issues affecting the enforcement of merger control in digital markets. The course provides both theoretical insights and practical tools, following a multi-disciplinary approach that combines both legal and economic perspectives from different jurisdictions of the world.
