

MERGER CONTROL: RECENT DEVELOPMENTS IN DIGITAL MARKETS

5 - WEEK ONLINE COURSE
1 March 2023 - 31 March 2023
3rd edition

Firms active in digital markets have proven remarkably active in mergers and acquisitions (M&As), constantly seeking to absorb companies — especially new start-ups — with a view to expanding their ecosystem while consolidating their market share. Such transactions raise several challenges, both in terms of substantial assessment and from a procedural perspective.

After completing this course, you will be equipped with the skills and knowledge needed to tackle emerging challenges for competition professionals and policymakers. Our expert instructors will guide you in analysing the M&A activity of digital incumbents and understanding whether and when such transactions raise concern.

The course adopts a multidisciplinary approach and an interactive learning approach, with each module featuring live classes, group exercises, dedicated reading materials, quizzes, videos and a forum for discussion.

Week 5

Our Annual Training in numbers

79
Countries

612
Total participants

WHO SHOULD ATTEND?

- Competition experts (lawyers, economists, policy makers) and academics who wish to fine-tune their understanding of the challenges posed by merger control in digital markets.

KEY BENEFITS

- Learn about key features of M&As in digital markets
- Increase your understanding of merger assessments and procedures
- Acquire a truly multidisciplinary understanding of the forces at play in the digital economy to bring back value to your organisation
- Share knowledge with professionals from other sectors and industries
- Expand your network of professionals who share similar but also complementary interests and expertise

The course is organised by the **Centre for a Digital Society** of the European University Institute (EUI). The Centre offers state-of-the-art training for practitioners, provides policy-oriented research, and promotes informed discussions on key policy issues in regulation and competition. This course represents the second block of the **Annual Training on Competition and Regulation in the Digital Era**.
